OBJECTIVE:

Dedicated .NET Developer with 7 years of experience specializing in the development of mobile and web applications. Adept at leveraging .NET, .NET Core, Xamarin, and ASP.NET to deliver innovative and efficient solutions. Passionate about staying updated with emerging technologies and committed to producing high-quality code to drive project success. Seeking a challenging .NET Developer position to contribute my expertise and collaborate with a dynamic team in delivering cutting-edge software solutions.

SUMMARY OF QUALIFICATIONS:

- Over 7 years of hands-on experience as a .NET Developer, consistently delivering high-quality software solutions.
- Proficient in the full software development life cycle, from concept to deployment and maintenance.
- Strong expertise in .NET, .NET Core, Xamarin, and ASP.NET, with a proven track record of successfully using these technologies to develop mobile and web applications.
- Skilled problem solver with a knack for identifying issues, proposing solutions, and optimizing code for performance and efficiency.
- Excellent teamwork and communication skills, collaborating effectively with cross-functional teams and stakeholders.
- Familiarity with database design and management, including working with MYSQL/SQL Server connection to APIs with expertise in designing and implementing robust and scalable solutions using .NET technologies.
- Microsoft Learn C# Certification: Microsoft Certified: C# Programming and Xamarin University Certification: Xamarin Certified Developer.

EDUCATION:

Bachelor Science Degree in Computer Science – National Open University, 2021

- Major: Computer Science
- GPA: 3.25 (2nd Class Honours)

National Diploma in Computer Science – Federal Polytechnic Offa, 2019

- Major: Computer Science
- GPA: 3.60
- Honors: Distinction Class Honors (Best Student)

PROFESSIONAL EXPERIENCE:

EUROBILL INVEST, NORWAY & SPAIN: January 2023 – August 2023

Position: Full Stack Developer

- The company specializes in importing cars from Norway to Spain using a dedicated platform.
- My role involved developing a range of solutions to enhance the company's productivity and efficiency on the platform.
- Developed a mobile bot to streamline tasks and processes related to the importation of cars.
- Created a web tool to complement the mobile bot, further improving workflow and productivity.
- Designed and developed a Chrome extension to enhance the company's capabilities on the platform.
- Implemented push notifications within the mobile bot to promptly notify the company of specific events on the platform.
- Developed the company's website which allows users to contact the company and receive car quotes when they want to sell their vehicles.
- I implemented the application using Xamarin Forms for the front end and utilized .NET Core and MySQL for the backend.

MAYA CORPORATION, SWEDEN & GHANA: June 2023 – August 2023

Position: Full Stack Developer

- The company was engaged in assisting a political party in analyzing and forecasting expected votes from each candidate for a primary election.
- I was employed to develop a comprehensive application with distinct roles, including Super Admin, Admin, and Researchers.
- Researchers were responsible for collecting data by interviewing individuals about their voting preferences and entering the responses into the application.
- Admin users had access to overall reports based on permissions granted by the Super Admin.
- The Super Admin had full visibility into all activities and data within the application.
- I implemented the application using Xamarin Forms for the front end and utilized .NET Core and MySQL for the backend.

TECHIE INFO SYSTEM, NIGERIA: July 2023 – September 2023

Position: Frontend Developer

- Received Figma designs for a Fin-tech mobile application intended for payment purposes.
- Implemented the design using Xamarin Forms for both Android and Ios.
- Implemented the provided APIs to develop the mobile application.
- Utilize payment gateway libraries require for the payment operations.
- Delivered the source code to the client, who intended to conduct internal verification before deploying the project to the public.

SUPPLYINGTECH LLC, USA: March 2022 – March 2023

Position: Full-Stack Software Developer

- Developed, maintained, and managed IT software solutions for Mobile and Web applications.
- Handled database management on MYSQL Server and Firebase.
- Designed and developed Bot Mobile Apps for trading automation across different platforms.
- Successfully managed data synchronization across all implemented platforms.
- Proficient in bot integration on existing apps and websites, as well as developing extensions for Google Chrome to perform custom actions for users.
- Specialized in creating bot applications or Chrome extensions (for web apps) to automate repetitive user actions.
- Utilized C# .NET for bot integration in mobile apps and Bootstrap and JavaScript for bot and extension integration in web apps.
- Required user login (when applicable), platform URL, API keys (when appropriate), and other relevant information to develop and integrate the bots.
- Whenever a web application was needed, utilized ASP.NET or .NET Core for development.
- Delivered APK, AAB, IPA files for TestFlight, or extension ZIP files for Chrome.
- Ensured that the delivered applications were for the user's personal use and not open source or publicly available.
- Maintained compliance with regulations, ensuring that future users seeking such integrations would contact you or other developers without violating any rules or regulations.

AFFIXCITY PARTNER SOLUTION, UAE: December 2021 – December 2022

Position: Frontend Developer

- Developed, maintained, and managed IT software solutions for Mobile and Web applications.
- Handled database management on MYSQL Server and Firebase.
- Designed and developed E-Commerce Mobile Apps for customer, partner, and verifications.
- Implemented an application for partner registration and service verification for internal use.
- The application facilitated access to home services such as plumbing through the app.
- Designed the landing page (https://affixcityapp.web.app) using HTML/CSS, android app is also available on play store.
- Worked with a provided Figma URL to design the app and completed the development using Java and XML on Android Studio.
- Concluded the project on Fiverr, receiving payment and delivering the project source code to the company, which intended to implement its backend internally.

EM&EM INFO-TECH SOLUTION, NIGERIA: August 2018 – November 2019

Position: Full-Stack Software Developer and Programming Instructor

- Developed, maintained, and managed IT software solutions for Desktop and Web applications.
- Handled database management on MSSQL Server and MS Access.
- Instructed and mentored young programmers in web and desktop app development using C#.NET, VB.NET, and ASP.NET.
- Effectively supervised and managed approximately 50 young programmers on a daily basis.
- Collaborated on the development of desktop applications for enterprises using C#.NET.

- Conducted training sessions for aspiring developers on HTML/CSS, ASP.NET, C#.NET, VB.NET, and the functionality of the .NET Core Framework.
- Designed applications tailored for specific needs, such as payroll systems, for various companies including restaurants and schools.

FREELANCE SOFTWARE DEVELOPER AND IT CONSULTANT: March 2016 – Present

Position: Full-Stack Software Developer (Self-Employed as Freelancer)

- Developed, maintained, and managed IT software solutions across various platforms, including Mobile, Web, and Desktop applications.
- **Desktop Applications**: Developed a range of desktop applications, including Fintech utilities app, Facial Student Attendance, Airline Reservation System, Estate/Hotel Management System, Image Steganography, Restaurant Management System, Stock Management System, Reconciliation App (for comparing Excel files), and more.
- **Mobile Applications**: Created mobile apps with features such as Fintech apps, E-learning apps, E-commerce apps, E-marketing apps, and more.
- **Web and APIs**: Designed and implemented web solutions and APIs, including Backend APIs and Databases, Fintech/Admin Management Websites, E-commerce websites, Online Student Assignment Submission platforms, E-Voting systems, Online Car Sales platforms, and more.
- Specialized in frontend development for Mobile and Web applications and excelled in Automation Integration with bots on both apps and websites.
- Successfully delivered various websites, including landing pages, e-commerce sites, business websites, and mobile applications to a diverse clientele.
- Proficient in programming languages such as C#.NET, Xamarin, Bootstrap, JavaScript, Kotlin, and Java for application development.
- Accumulated over seven years of professional experience in Mobile and Web development.

SKILLS:

- .NET and .NET Core
- Xamarin
- ASP.NET
- HTML, CSS, JS, & BOOTSTRAP
- -Android (Java/Kotlin)
- **Visual Studio:** - XAML, C#.NET, VB.NET, ASP.NET CORE MVC, ASP.NET FRAMEWORK MVC, ASP.NET RAZOR MVC, ASP.NET BLAZOR MVC, Progressive Web App (PWA).
- **Others: -** Swift (XCode), MS SQL SERVER, MYSQL, Firebase, Supabase, MongoDB.

PROJECTS:

1. **theBanker Fintech Mobile Application (TECHIE INFO SYSTEM, NIGERIA):**
    a. Developed a Fin-tech mobile application for payment and transactions based on Figma designs and integrated APIs.
    b. Delivered the source code to the client for internal verification before deployment.
2. **Car Import Automation (EUROBILL INVEST, NORWAY & SPAIN):**

    a. Developed a mobile bot, web tool, and Chrome extension to streamline car import processes from Norway to Spain.

    b. Implemented push notifications to alert the company about important events on the platform.

    c. Designed and developed the company website for customer inquiries and car quotes.

3. **PAC Research Data Collection and Analysis (MAYA CORPORATION, SWEDEN & GHANA):**

    a. Created a comprehensive application with Super Admin, Admin, and Researcher roles for collecting and analysing voter data for a political party's primary election.

    b. Utilized Xamarin Forms for the front end and .NET Core with MySQL for the backend.

4. **Affixcity App & Web (Affixcity Partner Solution):**

    a. Developed a mobile application for partner registration and service verification.

    b. Designed the landing page (affixcityapp.web.app) using HTML/CSS.

    c. Used Java and XML on Android Studio for mobile app development.

    d. Completed the project on Fiverr, delivering the source code for internal backend implementation.

5. **Self-Employed as Freelancer:**

    a. Designed and developed varieties of a web and mobile application with financial utilities features.

    b. Created a desktop application for tracking student attendance using facial recognition technology.

    c. Created an application for comparing data between two Excel files.

    d. Developed a range of mobile apps, web applications, and websites for different clients, including e-commerce, business, and e-learning platforms.

    e. Specialized in building bots and extensions for automating tasks on both mobile apps and websites, enhancing user experience and efficiency.

CERTIFICATIONS:

- Jobberman Soft Skills Training Certification (2021)
- Microsoft Learn C# Certification: Foundational C# Programming (2020)
- Xamarin University Certification: Xamarin Certified Developer (2020)
- NASS Overall Best Student, Computer Science (2019)
- NACCOSS Best Student in National Diploma (2019)
- Second Runner at NACCOSS Software Exhibition Programme (2019)
- MegaRich Consults & Networks LTD Certification of Proficiency (2018)

LANGUAGES:

- Proficient in English for effective communication.
- Currently in the process of learning German at a basic level.
